

Aditya Nayak

Senior AI Product Manager · 0→1 Platforms, Agentic AI & Monetisation

+91 70642 25041 | aditya.nayak.it@gmail.com | linkedin.com/in/aditya-nayak04 | nayakaditya.com

Senior Product Manager with 10+ years building consumer and AI platforms 0→1, including a fantasy-sports venture scaled to 500K+ users at 3M peak concurrency. Currently leading NextJobMate, a multi-tenant AI SaaS for job discovery and CV tailoring, and NJM Egress, its companion Android networking product. Depth in agentic AI, multi-LLM cost routing, high-concurrency systems, experimentation, and cloud unit economics.

EXPERIENCE

Restless Ventures Pvt. Ltd.

Senior Product Manager (Sep 2025 – Present)

Product owner for NextJobMate - a multi-tenant AI SaaS for job discovery, CV tailoring, and interview prep - and NJM Egress, its companion Android networking product. Own strategy, architecture, the typed-outcome reliability contract, and cloud unit economics.

- Own NextJobMate end-to-end across Next.js web, Expo mobile, MCP, and a paired Chrome extension on a multi-tenant FastAPI/PostgreSQL backend - 12 discovery sources plus direct job feeds from 18,775 employers on 28 ATS platforms.
- Deprecated a working authenticated-scraping capability as the wrong foundation for a paid product, ToS exposure, single-ban-takes-all-users-dark risk, unscalable ops, rebuilding discovery on public, partner, APIs, and ATS-direct lanes.
- Shipped NJM Egress, a companion Android product (mesh networking, proxying, on-device IP rotation, in-app render lane) replacing a paid third-party vendor at \$0 incremental cost.
- Designed the AI cost ladder - deterministic gates and embeddings before inference, cheap models for extraction, frontier models only for shortlisted candidates; led an 8-phase AWS migration cutting run-rate 58% (\$147→\$62/mo) with zero downtime.
- Root-caused zero end-to-end delivery to eight defects every dashboard reported as healthy - including a scoring component silently returning zero and deleting 30% of every score - and restored calibration rather than lowering the bar.

Tricket - Realtime Fantasy Cricket

Senior Product Manager (Founding Team - Feb 2020 - Aug 2025)

Founding-team Senior PM on a 0→1 fantasy cricket platform; owned experimentation, activation, retention, monetisation, and scalable architecture across an 8-person cross-functional team.

- Co-founded venture and led 15-person cross-functional team (engineering, design, analytics, ops, support)
- Scaled the product to 500K+ downloads and 300K+ registrations in 3 years through referral loops, content partnerships, and acquisition-channel experimentation.
- Built real-time AI prediction engine for live over-by-over forecasting + personalisation; increased in-play engagement 18% and reduced contest cancellation 12%, validated via A/B and incrementality holdouts.
- Achieved 60% install-to-registration activation (vs 45% industry baseline) via KYC-deferral experimentation
- Sustained 25-30% DAU/MAU retention cohort (~30K DAU on 110K MAU) through gamified engagement loops and 40+ funnel experiments.
- Architected high-concurrency leaderboard handling 3M peak concurrent users during IPL with zero ledger inconsistencies
- Restructured backend financial routing to absorb 2023 28% GST mandate, preserving 20% net commission and saving ≈INR 2 Cr/year in margin erosion.
- Managed compliant orderly wind-down (Aug 2025) per India's Online Gaming Act including user balance refunds, regulator communication, and cross-stakeholder coordination - demonstrating closure discipline alongside scale-up execution.

Helpen - IT Solutions

Product Manager (Mar 2018 - Jan 2020)

- Delivered 6+ end-to-end product lifecycles across agritech, fintech, and e-commerce with 95% on-time delivery; cut MVP time-to-market 35% through modular architecture and reusable API integrations.

Helpen - One Stop Solution

Product Manager (Feb 2017 - Mar 2018)

- Built and shipped a 0→1 consumer utility app in 3 months; engineered low-cost acquisition loops to 10K users in 6 months at <INR 15 CAC, validating PMF before scaling.

FEATURED PRODUCTS

NextJobMate - [nextjobmate.com](#)
Multi-tenant AI SaaS for job seekers - discovers roles across 12 public and ATS-direct sources, hydrates full job descriptions, scores fit, and produces tailored CVs, cover letters, and interview prep with full provenance. Web, mobile, and browser-extension surfaces; user-submit-only by design.

NJM Egress - companion product to NextJobMate
Android networking product powering NextJobMate's data supply - mesh networking, proxying, on-device mobile-IP rotation, and an in-app render lane. A build-vs-buy replacement for a paid third-party vendor at \$0 incremental cost.

Tricket - [tricket.in](#)
Fantasy cricket platform taken 0→1 to 500K+ users and 3M peak concurrency, with real-time micro-contests, an AI prediction engine, and cohort-driven retention. Wound down Aug 2025 under India's Online Gaming Act.

SKILLS

AI Product: Agentic AI · RAG · MCP · AI Cost Routing · LLM Product Development · LLM Evaluation

Product & Platform: Product Lifecycle · Stakeholder Management · Product Roadmaps

Growth & Commercial: A/B Testing · Retention Cohorts · Unit Economics · Build-vs-Buy Analysis · GTM Strategy

Technical System: API · Microservices · High-Concurrency Systems · Database design · Cloud Architecture

EDUCATION & AFFILIATIONS

B.Tech in IT Engineering	National Institute of Science and Technology (NIST)	Aug 2012 - May 2016
Product Strategist (Startup Incubation)	IIM Calcutta Incubation	Mar 2025 - Aug 2025
Innovator (Startup Incubation)	IIT Patna Incubation	Mar 2024 - Feb 2025
