KEY ACHIEVEMENTS

Checkout Conversion Uplift

Designed and integrated a digital gift card platform for Swatch UK, engineered for 4% checkout conversion uplift and >99% redemption success rate.

User Base Expansion

Scaled Tricket from 0 to 500K+ downloads and 300K+ registrations through high-frequency micro-contest mechanics.

Conversion Rate Improvement

Boosted install-to-registration conversion to 60% (vs 33% industry avg) by redesigning onboarding flow and deferring KYC to withdrawal.

CORE COMPETENCIES

Product Execution

Agile/Scrum, GTM Strategy, Unit Economics, 0-to-1 Lifecycle, PRD Authoring, Cross-Functional Leadership

Technical & AI Scoping

API Strategy, Cloud Architecture, Local LLMs (Ollama, LM Studio), Prompt Engineering (Claude, Gemini, ChatGPT), AI Workflows (ChatPRD, Replit)

Analytics & UX

Funnel Optimisation, Wireframing (Figma), Jira, Linear, Notion, Tableau, Mixpanel, Hotjar

PROFESSIONAL SUMMARY

Senior Product Manager with 9+ years of experience building 0-to-1 products and scaling high-concurrency platforms to 500K+ users across gaming, e-commerce, and SME software. Engineering background with hands-on expertise in scoping cloud architectures, API integrations, and AI/LLM workflows. Bridges GTM strategy with system architecture to ship features that directly improve unit economics (LTV/CAC) and conversion metrics.

EXPERIENCE

Restless Ventures Pvt. Ltd. (Client: Swatch) 09/2025 - Present

Lead Product Manager

- **Execution Roadmap & GTM Strategy:** Defined and launched a Digital Gift Card platform for the UK market, capturing last-minute and corporate gifting segments via phased rollout with fixed denominations and email-based delivery.
- **Technical Feasibility & Integration Delivery:** Orchestrated SFCC ↔ Global POS/Easy2Play integration — Adyen payment capture, automated PDF generation, and secure PIN encryption.
- **Product Experience & Edge-Case Management:** Scoped end-to-end sender/recipient journeys including multi-use redemptions (3 cards/basket cap), automated retry jobs, and communication fallbacks.
- **Cost Signal & Risk Mitigation:** Engineered fraud prevention through velocity limits and capture-first authorization model, mitigating digital asset abuse risks.
- **Target Performance Metrics:** Targeting 4% gifting checkout conversion uplift, >99% redemption success rate, and <1% payment error rate. (Platform in active rollout).

Tricket - Quick Commerce of Fantasy Cricket 02/2020 - 08/2025

Senior Product manager

- **Execution Roadmap & GTM Strategy:** Directed 0-to-1 lifecycle of a Fantasy Cricket platform with high-frequency micro-contests — drove viral acquisition to 500K+ downloads and 300K+ registrations.
- **AI & Predictive Engineering:** Led development of a real-time AI prediction engine for live over-by-over forecasting, driving in-play engagement and reducing contest cancellation rates.
- **Product Experience & Funnel Optimisation:** Redesigned onboarding by deferring KYC to withdrawal — achieved 60% install-to-registration conversion vs 45% industry average.
- **Retention & Engagement:** Sustained 25–30% DAU/MAU (~30K/~110K) through real-time "second-screen" features, gamified loops, and high-ROI referral programs.
- **Technical Feasibility & Architecture:** Scoped high-concurrency leaderboard architecture handling 3M users and peak IPL traffic with zero ledger degradation.
- **Commercial Strategy:** Restructured backend financial routing to absorb the 2023 28% GST mandate, maintaining 20% net commission without changing user-facing fees.

ENTREPRENEURIAL INCUBATIONS & EDUCATION

Indian Institute of Management, Calcutta

Incubated Product Strategist

Kolkāta, India 03/2025 - 08/2025

Indian Institute of Technology, Patna

Incubated Innovator

Patna, India 03/2024 - 02/2025

National Institute of Science and Technology (NIST)

B.Tech in IT Engineering

Berhampur, India 08/2012 - 05/2016

PROJECTS

EXPERIENCE

Helpen IT Solutions 01/2019 - 06/2021

Product Manager (Concurrent with Tricket, ran consultancy while building Tricket)

- **Product Strategy & Scoping:** Delivered end-to-end lifecycles for SME clients across agritech, fintech, and e-commerce — translated ambiguous objectives into deployable architectures.
- **Requirement Engineering:** Authored PRDs and logic flows, aligning stakeholder vision with engineering constraints.
- **Technical Delivery & Architecture:** Managed SDLC execution and cut MVP time-to-market. Defined scalable API integrations and database schemas.

Helpen - One Stop Solution 02/2017 - 12/2018

Product Manager

- Bootstrapped a 0-to-1 consumer utility app, launching v1.0 MVP within 3 months via constraint-driven planning.
- Engineered low-cost acquisition loops to secure the first 10K users, validating product-market fit before allocating capital to scaling.

Tech Mahindra 08/2016 - 02/2017

Associate Software Developer

- Built a core technical foundation in enterprise application development, focusing on bug resolution, unit testing, and code refactoring within standard SDLC frameworks
